Name and surname: Ducancel Frédéric

Title: Dr. (PhD in 1989, University Paris VI)

Contact: frederic.ducancel@cea.fr

Frédéric Ducancel is a molecular and cellular research scientist at the French Atomic Energy Commission (CEA). From 1989 to 2013 he worked at the CEA-Saclay centre. Specialist in peptide and protein engineering and in animal toxins (cloning, expression, mutagenesis, directed molecular *in vitro* evolution, structural analysis, deep transcriptomic exploration *via* NGS) he was head of a joint research laboratory with BioMérieux (1999-2011) and head of the Laboratory of Antibody Engineering for Health (2007-2013). Since October 2013, he moved to the CEA centre of Fontenay-aux-Roses, as deputy Director of the Department of ImmunoVirology (Director: Dr. R. Le Grand). As such Dr. F. Ducancel is in charge of the operating management of the Department and of the National Infrastructure IDMIT.
