

Catherine Chapon, (PhD in Biophysics), is Associate Professor at the University of Paris-Sud XI. She is the coordinator of the programs focusing on the development of *in vivo* imaging approaches (fluorescence, PET) to study host/pathogens interactions and immune responses to infection and to treatments in models of infectious diseases in non-human primates at the Division of Immunovirology (SIV) since 2009. She is leading the *in vivo* Imaging Platform at the IDMIT Center.
