

**Dr Anne-Sophie Gallouët** (PhD Doctor in Biology, 2012) is the coordinator of the core facility FlowCyTech. This team is involved in programs, which include flow and mass cytometry, to study immune responses to infection and/or treatments in models of infectious diseases in non-human primates at the IDMIT Center. She develops strong partnership with collaborators in the Kremlin-Bicetre hospital to standardize flow cytometry approaches between human samples and NHP models.
